Materials

Forex

Forex is a lightweight plastic material made from foamed PVC. It has a smooth surface and is widely used in the graphic industry for its excellent print quality and easy workability.

- + **Lightweight yet sturdy:** Forex is a lightweight material with high rigidity, making it easy to handle and install without compromising durability.
- + **Excellent print quality:** Its smooth, even surface ensures sharp color reproduction and fine details, giving printed designs a professional look.
- + **Easy to process:** Forex is flexible, double-sided, and easy to cut, drill, and shape, offering great versatility in design and application.
- + **Cost-effective:** Compared to materials like acrylic or metal, Forex provides an affordable solution without sacrificing quality.
- **Scratch sensitivity:** The soft top layer of Forex makes it prone to scratches, requiring careful handling during transport and installation.

Materials

Multiplex

Multiplex is a high-quality plywood material made of multiple layers of wood veneer, cross-laminated for extra strength and stability. This material can feature a white top layer.

- + **Lightweight and strong:** The poplar veneer construction makes the panel both easy to handle and sturdy for various applications.
- + **Uniform structure:** The multiple veneer layers create a consistent and smooth surface, ideal for different uses.
- + **White top layer:** The white finish provides a neutral base for further customization or direct application.
- **Limited moisture resistance information:** No specific details are provided regarding the material's resistance to moisture, which may be important for certain applications.

No white top layer

White top layer

Materials

Re-board

Re-board is an innovative cardboard material with a unique honeycomb structure, making it both lightweight and exceptionally strong. These properties make it ideal for various applications, including displays and exhibition stands.

- + Lightweight yet strong:** The honeycomb core structure provides exceptional strength while keeping the material light enough for easy transport and handling. This makes it ideal for temporary and mobile applications.
- + Versatile in design and customization:** Re-board can be easily cut, perforated, and printed with sharp, vibrant designs. This offers endless possibilities for custom creations, such as life-size cut-outs and displays.
- Limited weather resistance:** Not suitable for long-term outdoor use as the material is not water-resistant.
- Fire safety:** Not flame-retardant, making it less suitable for certain public spaces.

Materials

Easyprint

This lightweight yet sturdy panel material is suitable for various applications. Its core is made of white foamed polystyrene, while the top layers consist of white polypropylene with a matte finish.

- + **Lightweight yet sturdy:** Easy to mount and handle without compromising durability.
- + **Water-resistant surface:** Easily cleaned and maintained for long-term use.
- + **Weatherproof material:** Suitable for both indoor and outdoor environments.
- **Fire safety:** Not flame-retardant, making it less suitable for certain public spaces.

Textile booths

L-standard banner

Canvas material

Banner 510

Banner 510, also known as Frontlit Banner, is a highly versatile PVC material commonly used for a wide range of applications. It is ideal for banners, garden posters, construction fence covers, barrier banners, and large-format prints. Thanks to its **water-resistant properties**, it holds up well in outdoor environments, ensuring durability in various weather conditions. Additionally, its **flame-retardant** certification makes it a safe choice for use in public spaces, providing both reliability and compliance with safety regulations.

- + Extra-strong PVC banner, making it suitable for various applications
- + Water-resistant, perfect for outdoor use
- + Flame-retardant, safe for public spaces
- + Fully recyclable through the SignAgain project
- Glossy top layer may produce a slight sheen

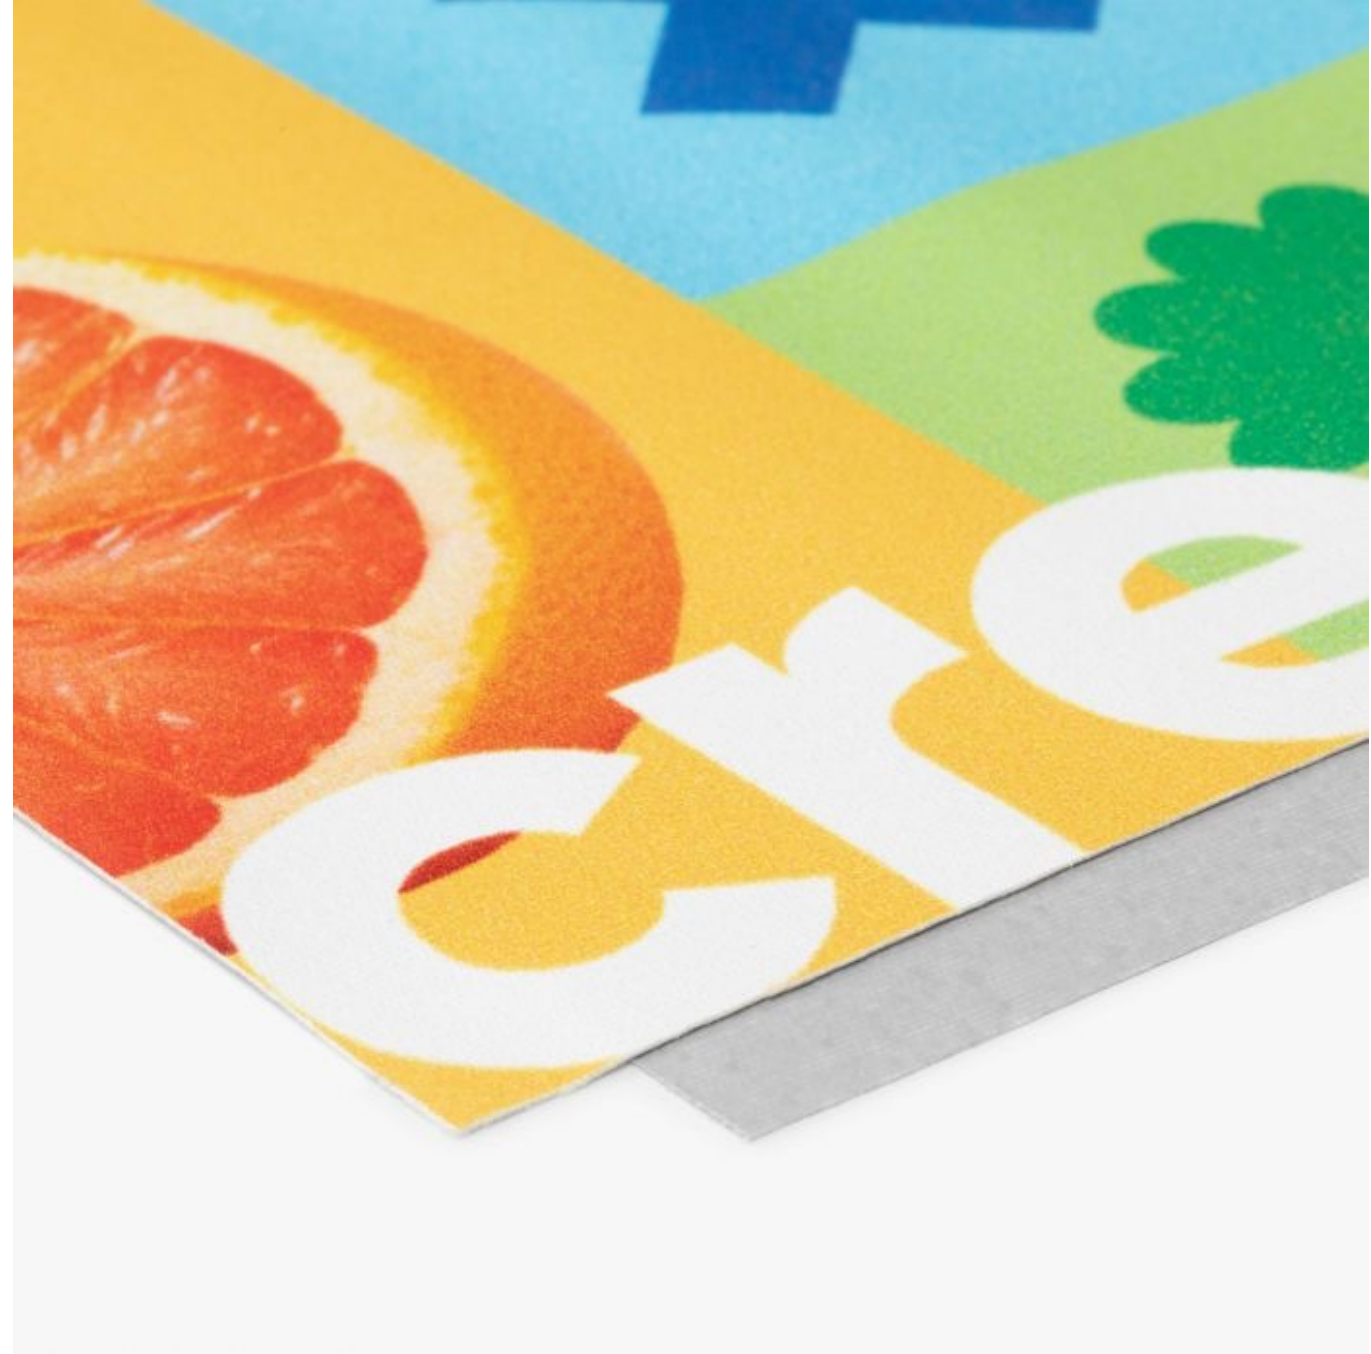

Canvas material

AirTex

This polyester wall covering with a PVC top layer has a matte finish and a lightly ured surface. The PVC-coated layer **prevents creases and tears**, making it easy and quick to apply to walls. Its water-resistant top layer provides excellent **protection against damage and stains**. Airtex® wall covering features a light gray backing, also known as greyback, which **prevents background color differences from showing through**. This allows the material to be applied to colored surfaces without affecting the visibility of the printed design.

- + Dirt- and water-resistant, making it easy to clean
- + Flame-retardant, safe for public spaces
- + Thanks to the gray backing, the underlying surface does not show through.
- Challenging to recycle due to the combination of materials

Canvas material

SanoTex

Sanotex is made of polyester with a PVC-free coating, making it both **wrinkle-resistant and scratch-proof**. Basicwall features a light gray backing that prevents **background color differences from showing through**, ensuring a uniform look. The water-repellent top layer provides excellent **protection against damage and stains**. Thanks to its PVC-free composition, Sanotex is also **fully recyclable**, making it a sustainable choice.

- + Dirt- and water-resistant, making it easy to clean
- + Flame-retardant, safe for public spaces
- + Thanks to the gray backing, the underlying surface does not show through.
- + 100% polyester, making it fully recyclable
- Water-repellent coating, which may create a slight sheen

Canvas material

Black & white

The **black-and-white banner** is a type of PVC material similar to Banner 510 but with a black, matte backing. This black layer prevents sunlight or artificial light from shining through, ensuring the print remains clearly visible on the front.

- + Durable PVC material, making it suitable for various applications
- + Black backing prevents light from shining through
- + Water-resistant, ideal for outdoor use
- + Flame-retardant, safe for public spaces
- Glossy top layer, which may create a slight sheen
- Difficult to recycle due to the combination of materials

**Go big, stand bold, and let
them stare.**
